Experience Summary

Guruprasad Hegde is an Analyst at Deloitte with nearly 2 years of experience in data analytics, specializing in the Telecom, Media, and Technology sectors. He has strong communication and interpersonal skills, is highly organized, and demonstrates a dedicated work ethic. Guruprasad excels in problem-solving and confidently handles ambiguity, consistently delivering effective solutions.

Relevant Work Experience

- Worked with a large telecom team as part of the Group Revenue Assurance team, where I was responsible for identifying and resolving revenue discrepancies between multiple business entities.
- Conducted comprehensive billing validation and prepared detailed reports to ensure accurate revenue recognition.
- Designed and implemented new validation methods and scripts to accommodate evolving requirements and processes, significantly improving process accuracy and efficiency.
- Extensively leveraged Oracle SQL across multiple databases to validate and identify revenue discrepancies between various business entities, ensuring data integrity throughout the process.
- Introduced Python to automate repetitive and monotonous tasks, significantly boosting productivity and efficiency.
- Played a key role in the migration from one billing system to another, ensuring a smooth transition and continuity.
- Collaborated with cross-functional teams to drive process improvements while also performing various ad-hoc activities at the client's request, often under strict deadlines, to provide crucial insights.
- As part of an internal project with a large telecom company, I collaborated on a rapid digital maturity assessment model. This initiative aimed to help the company's Internal Audit function realize its digital vision. I was involved in designing a comprehensive digital maturity toolkit for self-assessment, which evaluated the current state, ongoing initiatives, and future aspirations. This model provided insights into existing capabilities and industry-leading practices, identified current state gaps, and prioritized digitization opportunities. The resulting recommendations helped the company develop a future roadmap for enhancing their digital audit functions.
